This was a great game!. Great game. A lot levels and logic puzzles. I am using my PC xbox360 controller and great to control the marble.. great puzzle marble game, has a better look and feel than other marble games. many different power ups, twists & turns in gameplay.. This game reminds me of Marble Blast Ultra but with a lot more cool features/Vabilities Added in,more customizations for your Marble,and with very interesting levels. But I would recommend playing this game with a controller but on keyboard it's just fine. I love this game and I hope there would be updates soon.

I would recommend :). Just started playing...awesome game...took a few tries to get the hang of it and now I can stop playing...want to keep going and see what the next levels will be and a good challenge game!!! My new favorite pass time game!
